*Claims Allowed*

Claims 1-26 are allowable over the prior art of record. The claims are allowed because the prior art does not anticipate nor render obvious the invention of a method and apparatus for compensating for a pump speed effect on a transmission line pressure including determining an adjusted line pressure based upon a desired line pressure and an effective engine speed, and adjusting a pressure control actuator according to the adjusted line pressure.

*Prior Art Discussed*

The references cited by the examiner are deemed pertinent to applicant's disclosure. Arai '844 shows a transmission line pressure control but is not responsive to engine speed. Likewise, Vukovich '970 and Iwatsuki '080 show transmission line pressure controllers, but are not responsive to engine speed. The examiner determined that the broadest reasonable interpretation of the term "effective engine speed" did not include "vehicle speed", since the intervening transmission and clutch/torque converter could alter the speed relationship between the two.

*Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dirk Wright whose telephone number is 703-308-2160. The examiner can normally be reached on Monday through Friday, 8AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on 703-308-0830. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
